Master

Time to maximise Your Workforce

Schedule Master - the intuitive software that streamlines your shift management, optimises effectiveness and saves money

In your line of business, dealing with a diverse workforce and shift rostering, you need to gain maximum benefit from your staff while minimising payroll costs. Schedule Master's sophisticated scheduling algorithm organises staff rosters, deploys employees in the most cost-effective manner and guarantees optimal time-effectiveness while avoiding errors in medium to large scale companies and organisations.

Ultimate Integration

Schedule Master's web-based architecture enables total integration with all existing HR, payroll and customer billing systems at your organisation. This modular solution can be structured with self-service features and programmed to fit your specific organisational characteristics, establishing a platform for updates and future upgrades.

Cost Effective

Schedule Master is a money saver for your organisation. By dramatically enabling you to gain greater control over staff placement and presence, it prevents unnecessary expenditure and ensures that the most cost-effective employees are utilised at all times.

Methodological Skill

Founded in 1990, Synel provides technologically complete software solutions. Synel uses advanced methodologies in order to implement the Schedule Master solution, tailored to your organisation's size and specific scope of activities, and allowing you varied and scalable licensing premises.

Benefits and Advantages

- Proven time & cost saver
- Enables up-to-date information on all employees' skills, qualifications and restrictions
- Analyze and deploy employees over a variety of time frames: daily, weekly, monthly and annually
- Schedule days off, holidays and sick leave
- Hierarchal access for different levels of the organisation provides overall security feature
- Automatic rostering or manually assign the best employee to a specific position at the optimal time
- Real-time warnings prevent manual input errors
- A wide range of addition options, such as automatic SMS or e-mail to each employee informing assignation, and much more
- Web based architecture enables employees to post and receive rostering updates via internet
- Eliminates overtime by offering reliable cost-analysis
- Improved decision making with relevant online business information

What our customers say

"We selected Schedule Master as our preferred Time and Attendance solution, and since implementation have been very pleased with the system's performance. It has saved us a great deal of time and I would have no hesitation in recommending both Schedule Master as a system you can work with and Synel as an excellent company to do business with."
George R. Vaughan
Project Manage Rugby Football Union, Twickenham

"When you provide security services to some of the largest events across the UK, you have to be up to par with best in the industry. Choosing Synel's solutions helps us to stay competitive and in control of all events we secure, no matter the size. ScheduleMaster is definitely a win-win solution."
Mahesh Hari
COO, AP Security
