Using HARMONY Demo server 19th lesson

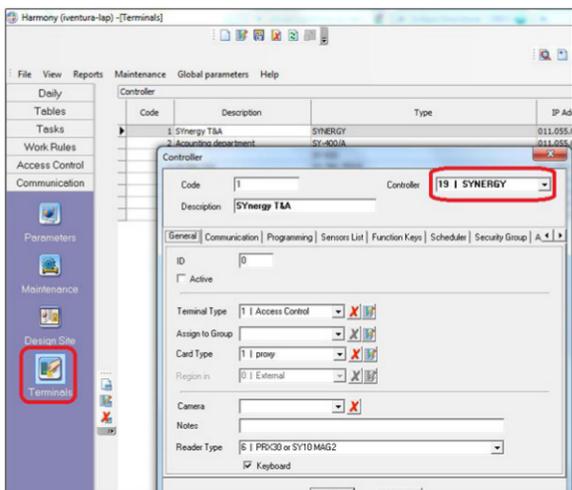

Enter the HARMONY Client
use the user name and password provided by the tech team

SYnergy

Synergy can work in off-line where the permission check done internally using light Sql DB or on-line mode using IIS server web service.

Steps for Defining the Synergy Terminal

1. Terminal type

2. Card type

Example: FP + Proximity reader:

- Start from 1 length 10 (FP length must be up to 10 characters)
- Max Length - 14 char (standard proximity badge decoding)
- Variable, padding "0" from right

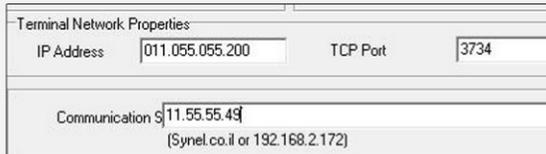

3. Reader Type

4. Communication

- IP Address (if there is no TCP/IP, define the ID instead)
- Communication: for on-line IIS - set the server IP

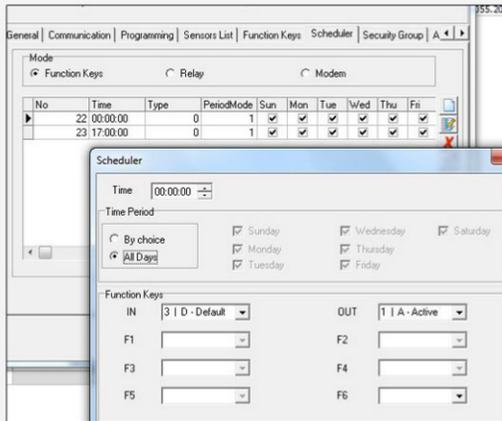

5. Function Keys

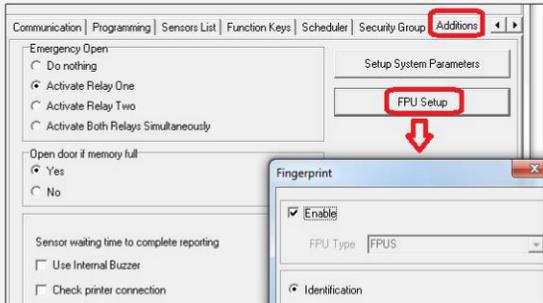

At this screen define for each function the off line and on-line check and display.

6. Key Scheduler

7. Fingerprint (optional)

See you in the next lesson..
