WHY SYNEL™?

Synel provides an innovative web based solution, ideal for the easy management of employees' activities – including time and attendance, scheduling, access control and absence request.

Key Features

- Efficient and easy
- Real-time information
- Mobile access
- Employee authorisation levels
- Access control module
- Notifier module
- Documents e-filing module

Employee Management

Interactive Screens

Broad and practical employee management screens can be used to view a whole company or a single department or branch.

Live Status Tabs

The employee attendance is presented in a real-time status screen; each employee record is colour highlighted showing if the employee is in or out of the building or has exceptions.

PRESENCE INFORMATION PANEL

Daily Activities

Clock In Clock Out was never so easy, while the editing possibilities and the multiple adjustments offered make your life so much easier. Absences can be entered anytime, anywhere.

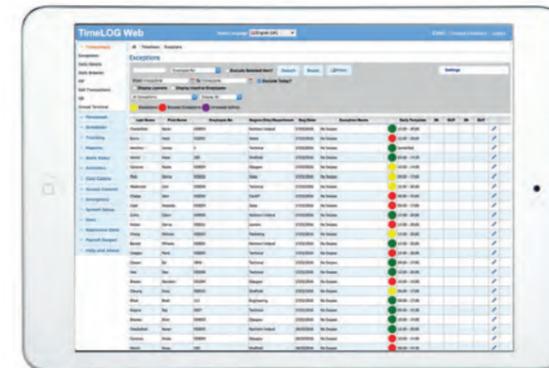

Absence Request/Authorisation

Employees can request their own holidays and absences directly from the web module.

Virtual Terminal

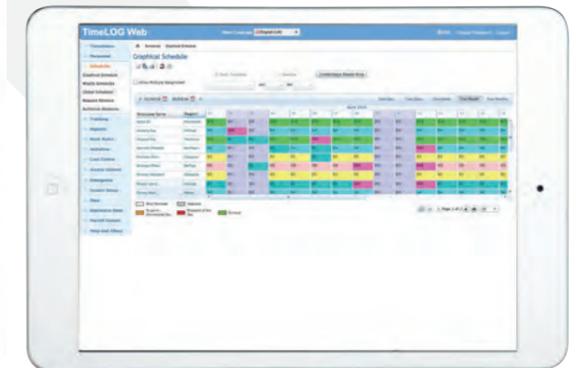

Clock In while you are online. The online Terminal can also be used to enable employees to clock in and out from their Web Browser when they start and finish work.

EXCEPTIONS RULES

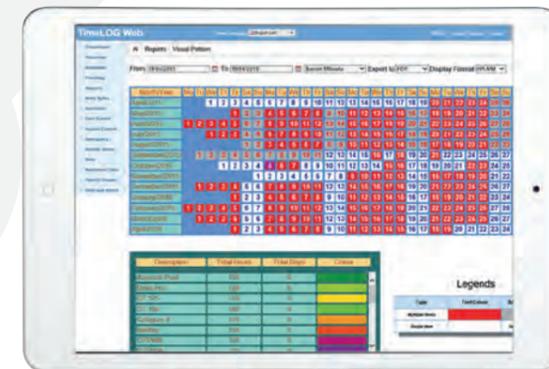

Employee warnings and discrepancies. Lateness, missed breaks, leaving early, absences, are all automatically highlighted, according to organisations specific work rules.

SCHEDULE SCREEN

Schedule your ideal work plan with the advanced graphical shift and absence planner. The graphical Scheduler has a graphical roster planner where groups of employees may be scheduled to work specific patterns of shifts.

REPORTING

Easy Timesheets & Reports

Review your employees timesheets from wherever you are. Create reports with time and attendance data anytime, anywhere.

Customised Solutions & Attentive Customer Service

No one solution fits all. Our R&D department offers customised solutions to fit the needs of your business or organisation. Moreover, an attentive Customer Service team is there to help you and provide you with all the necessary support you may need.

Mobile Workforce Management via smartphone app

- Total mobile workforce management using QR code with tablet and smartphone.
- Managers can track attendance, activities, breaks, requests, absences and extract valuable data anytime – anywhere.
- Employees can download the application to their smartphone and register their phone with the site username and password.

Synel products and services are used and trusted by the biggest brands in the UK
